

## 2014/15 Statewide Tobacco-Use Prevention Education (T.U.P.E.) Cohort I Grant Online Annual Report

---

Tobacco-Use Prevention Education (TUPE) funds support health education efforts aimed at the prevention and reduction of tobacco use. The TUPE program provides funding for programs in grades six through twelve through a competitive application process. Funds are awarded to local educational agencies that propose to replicate evidence-based, effective programs. TUPE grantees must implement instructional, youth development, intervention and cessation activities for students. Grantees may also implement supplemental activities and special events that reinforce the required program.

All local education agencies certified as having a fully implemented tobacco-free school district board policy are eligible to apply for funding. Programs are locally developed, but are expected to align with the Master Plan of the Tobacco Education and Research Oversight Committee, the Centers for Disease Control and Prevention's (CDC's) Guidelines for School Health Programs to Prevent Tobacco Use and Addiction, and the recommended California guidelines for tobacco prevention in Getting Results.<sup>^</sup>

The purpose of the TUPE program is to reduce youth tobacco use by helping young people make healthful tobacco-related decisions. Students receive research-validated tobacco use prevention instruction and activities that build knowledge as well as social skills. Students take part in youth development strategies that involve youth in advocating for a tobacco-free California and becoming tobacco prevention leaders. Collaboration with community-based tobacco control programs is an integral part of program planning. The school, parents, and the larger community must be involved in the program so that students will be aware of a cohesive effort and concern for their health and, consequently, their ability to succeed in school.

Cohort I Competitive TUPE Grantees, funded from 2014-15, are required to complete an annual online survey, in addition to other reporting requirements. Via the online survey grantees provided information about delivering instruction to the general population, youth development, intervention activities, cessation programs, services to targeted populations, staff development, parent training, and community involvement. The aggregated results of the 17 funded grantees are displayed in the tables that follow. The list of the participating grantees is located in Appendix A.

## Executive Summary

---

Listed below are highlights of the Annual Report information submitted by the TUPE Grantees:

- The most often used research-validated/evidence based programs are *Project Towards No Drug Abuse* (16), and *Project ALERT* (15). One grantee indicated they implemented one research-validated/evidence based programs, 16 grantees implemented two or more programs listed on the Annual Report approved program list. (See Table 1) The majority of students (74%) that received a research-validated/evidence based program were in the 7, 8 or 9<sup>th</sup> grade. (See Table 2) The most common non-research based validated programs employed by grantees was *Teens Tackle Tobacco* (74% of students). (See Table 3)
- The most popular non-curricula activities or strategies offered were *Red Ribbon Week* (43% of students), followed by *Teens Kick Butts/Ash* (16%). (See Table 4)
- Most popular youth development activities were *Youth Involvement Anti-Tobacco Advocacy* (35%) followed by *Tobacco Use Prevention Peer Educator* (27% of students) (See Table 5)
- Of the 3,772 students who were involved in intervention programs; 33 percent were involved in *Smokeless Schooldays: Smokeless Saturday School* and 34 percent were involved in *Intervention with Teen Tobacco Users (TEG)*. (See Table 7)
- Of the approximately 3,115 students that were involved in cessation programs, most utilized the *California Smokers' Helpline* (53%). (See Table 9)
- Parenting or pregnant minors were identified (2,374) and 36 percent were served. Five grantees offered both school-based and community programs. One grantee provided only a community program and six grantees offered neither a school nor community based program. (See Table 11)
- Sixty percent of classified staff and 75 percent of certificated staff were trained in general TUPE information. (See Table 12)
- Almost 88,000 parents received general TUPE information. (See Table 13)
- Grantees mostly collaborated with local educational agencies and Public Health Departments on youth development activities. Other grantees worked with local government and non-governmental agencies on tobacco control planning issues. (See Table 14)
- Table 15 lists each type of program (researched validated, non-research validated, non-curricula activities, etc.) and the number of participating students.
