

2011 / 12 Statewide Tobacco-Use Prevention Education (T.U.P.E.) Cohort F Grant Online Annual Report

Tobacco-Use Prevention Education (TUPE) funds support health education efforts aimed at the prevention and reduction of tobacco use. The TUPE program provides funding for programs in grades six through twelve through a competitive application process. Funds are awarded to local educational agencies that propose to replicate evidence-based, effective programs. TUPE grantees must implement instructional, youth development, intervention and cessation activities for students. Grantees may also implement supplemental activities and special events that reinforce the required program.

All local education agencies certified as having a fully implemented tobacco-free school district board policy are eligible to apply for funding. Programs are locally developed, but are expected to align with the Master Plan of the Tobacco Education and Research Oversight Committee, the Centers for Disease Control and Prevention's (CDC's) Guidelines for School Health Programs to Prevent Tobacco Use and Addiction, and the recommended California guidelines for tobacco prevention in Getting Results.[^]

The purpose of the TUPE program is to reduce youth tobacco use by helping young people make healthful tobacco-related decisions. Students receive research-validated tobacco use prevention instruction and activities that build knowledge as well as social skills. Students take part in youth development strategies that involve youth in advocating for a tobacco-free California and becoming tobacco prevention leaders. Collaboration with community-based tobacco control programs is an integral part of program planning. The school, parents, and the larger community must be involved in the program so that students will be aware of a cohesive effort and concern for their health and, consequently, their ability to succeed in school.

Cohort F Competitive TUPE Grantees, funded from 2010-13, are required to complete an annual online survey, in addition to other reporting requirements. Via the online survey grantees provided information about delivering instruction to the general population, youth development, intervention activities, cessation programs, services to targeted populations, staff development, parent training, and community involvement. The aggregated result of 38 funded programs is displayed in the tables that follow.
